CHARGING

When the battery is low, the device will automatically shut down to conserve power. Connect the 5V DC end of the charging cable to the device and connect the USB end to your computer or USB wall charger.

This device has built in overcharge protection and can be safely used for a prolonged period while connected to power. It can be recharged while powered on or off. Full recharge will take approximately 3-4 hours.

Battery life is dependent on usage and music volume.

If the device is unused for a prolonged period, it is recommended that you recharge once a month to protect and prolong the battery life.

IMPORTANT SAFETY INFORMATION

Do not expose the battery to fire or high temperatures.

SETTING THE TIME

In Clock mode, hold M until the display flashes. Use the 0-9 buttons to set the correct hours. Press M again, the minutes will flash. Use 0-9 to set the correct minutes. Once the correct time is set, leave for 5 seconds, the display will stop flashing and the time will be saved
